It is with much pleasure that commend Mr. E. T. Beribut as a Piano Forte Tuter and regulator. To say that ha is an excellent tuner, would not be doing it in justice, for I can without helicition say that he is capable of tuning a Fiano as near to perfection as it be possible for a Piano to be tuned; but the greatest recommendation for him is the musual length of time which his Pianos sensating that it tune. I have never, either in Europe or Amenica, seen a mine when I would so cheerfully and with so much confidence employ to tune or regulais a Piano Forte as Mr. Hurbut, and as cheerfully recommend aim to all who wan: Pianos tuned.

The Cantested Governorship.

It is the prevailing impression, at Madison and in our city, that the Supreme Court will pronounce its judgment in this exciting case by Wednesday, or Thursday next. The opinion seems to be general too that the decision will be adverse to the Usurper, and in favor of the nightful claimant. Rumors reached us of a determination on the part of Mr. Barsrow and his more desperate partizons, to resist the decree of the force of arms; and the fact is notorious that muskets and rifles have been forwarded to Madison, by Baratow's order, and distributed by his Private Secretary to men whom it was supposed they could trust.

We are unwilling to believe that Mr. Barstow, or his backers, can be so insune as to precipitate such an issue and plunge the State into anarchy, tain the Court, defend the right and protect the

Bogus Barstow Authorities. A correspondent of the Racine Democrat, wit ring from Madison in relation to the contested Governorship, indulges in the following fiction:

"There is probably no well advised lawyer who does not know that Barstow is right in denying the jurisdiction of the Court in this case.—Such norn as J. J. Spring is advancing with slow, but steady pace. The snow has nearly disappeared; the lee is gradually wasting away; and the frost is coming out of the ground. On all sides there are preparations for an active business season. Vessel-owners are getting their numerous craft in the riv-er, ready for a start. Builders are hanling stone, brick, piles and lumber. House and store hunting is going on vigorously. New faces are to be seen in our streets daily. Merchants are preparing for large accessions to their stocks, and for an increase in the number of their custom-ers. Real Patate Deniers are counting the profits already secured in investments made but a few weeks, or months ago, and looking out for now ventures. Data Sm.—I have examined with much care and interest your Brick Moulder and Temperer, or Capito Hill, in this city, and cheerfully bear testimony to its excellence. I consider its simplicity of construction, its rapidity of execution, and its durability, to be apparent to every observer, and I can say that the experience of twenty-few years in the manufacture of bricks, has given me good opportunities of judging closely in this matter. I think your machine is univalled as a Brick Machine in the Leited States.
